

## Peguntas dirigidas al Dr. Stephen Crooks

1. What do you think OF THE IMPACT OF THE Marina in San José del Cab?

**It depends on how the fresh water a ground water is managed. If fresh water supply is high it will help keep salt water out. If fresh water supply is less, salt water the brad an the marine will push in to the estuary**

2. How many people are involved in restoration project 1. Small, 2. Big.

**Restoration in the US is a big industry because a legal requirement for mitigation. On project are need people with experience (biology, hydrology, law, engineer so many )**

3. Do restoration projects pay attention to flora and fauna?

**Yes very much. Restoration has many often endarenged or commercial species.**
